MAKE, DO & TREND

INSTRUCTIONS

1. Take your stencil and draw around it with your pencil on the shiny (like tracing paper) side of the Bondaweb.

2. Identify the 'right' and 'wrong' side of the fabric. Roughly cut out your stencil shape so no paper is hanging over the fabric (to avoid it sticking to the iron or ironing board) and iron face up onto the 'wrong' side.

3. You only need a 1 sec or so to bond it. Once bonded, cut around your stencil neatly.

4. Lastly, peel the paper away from the fabric, there will be a 'new' glue attached to the fabric stencil. Flip it over and place where you would like it on the babygrow and use the iron again to bond it onto the babygrow. Please see the FAQ sheet if there are any problems.
